Pavel Sheludko

*Highly organized Front-End Developer skilled in web frameworks and C# Unity.
Expert in teamwork, delivering innovative web and game solutions*

Offenburg, Germany | **152.3611.4709** | sp6835317@gmail.com

PROFESSIONAL EXPERIENCE:

Ravildsgn.com, (Remote)   **December 2023 - January 2024**
Front-End Developer   **(5 weeks project)**
- Built a website using Astro and Bootstrap 4, enhancing performance and aesthetics.
- Collaborated effectively with the designer and client, ensuring alignment and satisfaction.
- Delivered the webpage within a tight timeframe, maintaining high quality.
- Provided rapid feedback to the client, fostering a productive and comfortable work environment.
- Leveraged frameworks to accelerate development and optimize the webpage.
- Utilized GitHub for efficient version control and collaboration.
- Followed a Figma design to successfully complete both front-end and some back-end tasks.

Infinity Rocket Smart Technologies, (Remote)   **August 2023 – December 2023**
Front-End Developer   **(5 month project)**
- Remade the Front-End part of the product for Market Making tools for decentralized exchanges (CEX).
- Collaborated with back-end developers to connect and implement front-end with back-end.
- Utilized Figma to implement a new front-end section of the website, ensuring a cohesive user experience.
- Communicated with designers to identify and resolve design issues, ensuring a flawless final product.
- Provided prompt and constructive feedback to both the team and clients, facilitating issue resolution.
- Worked with the Tailwind framework to speed up the web page layout and optimize the pages.
- Managed version control using Git and GitHub, ensuring efficient tracking of changes.

                                                                                                          January 2023 – April 2023
Front-End Developer   **(2 month project)**
- Revamped the user interface of the product for market-making tools for decentralized exchanges (DEX).
- Utilized the Bootstrap 4 framework to refine web page layout and improve page optimization.
- Integrated the front-end components with back-end code to ensure seamless data flow and functionality.
- Ensured cross-browser compatibility and responsive design for optimal performance on all devices.
- Analyzed the existing UI to identify areas for improvement in functionality and aesthetics.
- Implemented responsive design for optimal adaptation across all devices and screen sizes.

T7T Labs, (Remote)   **April 2022 – June 2022**
Front-End Developer for product MeetNubi   **(3 month project)**
- Developed a website using HTML5, CSS3, and JavaScript, following modern standards.
- Implemented the front-end based on designs, ensuring a seamless interface.
- Optimized website performance, enhancing load times and responsiveness.
- Integrated visual features from open-source projects to enhance aesthetics.
- Communicated with the team and client, addressing all requirements and feedback.
- Utilized GitHub for version control, and maintaining an organized workflow.

                                                                                                          June 2022 – July 2022
Front-End Developer for T7T Labs   **(6 weeks project)**
- Developed a website using HTML5, CSS3, and JavaScript without frameworks.
- Gained first professional experience in web development.
- Designed and implemented the front-end components.
- Provided prompt feedback to the client, ensuring quick iterations and satisfaction.
